

WHY IV THERAPY?

IV therapy is the most effective delivery system for essential vitamins, minerals, and amino acids. By bypassing the digestive system, we can give you higher doses of the good stuff and ensure 100% absorption – rather than the 40-60% absorption rates you'll get from oral supplements. The benefits of IV therapy include increased energy, enhanced mood, improved sleep, and decreased stress, to name a few. We offer a selection of IV treatments: our expert Calgary naturopathic doctors will help find the right one for you.

- MADE SPECIFICALLY FOR YOU AT TIME OF APPOINTMENT
- PERFORMED BY NATUROPATHIC DOCTOR
- CAN BE CUSTOMIZED TO YOUR NEEDS
- SESSIONS TAKE APPROXIMATELY 30 MINUTES – 1.5 HOURS

QUICK FIX \$110

ABOUT THE BRONZE BAXX SHOT BAR ~ VITAMIN INJECTIONS

- 1) Use high quality, easily metabolized forms of nutrients to maximize absorption
- 2) Have a small amount of anesthetic added to reduce pain
- 3) Are quick and easy and lets you get on your way in 10-15 minutes! Great for people needing a smaller dose then our IV's for a quick boost on the go.

4 SHOTS TO CHOOSE FROM!

B12 BOOST

Vitamins B12 and B9 are super important in metabolism, weight loss and energy. Also, B12 is deficient in vegetarian diets, difficult to absorb in oral supplements and often in unusable forms. We use high quality, easily metabolized forms of these nutrients to help get the most benefit from your B12 injections. Depending on the case, B12 can be done as often as every week to every month. **\$35**

STRESS BOOST

Formulated with adrenal health and energy in mind. This injection combines high dose B vitamins with energy boosting nutrients to combat stress when you are feeling burnt out. **\$55**

SLIM BOOST

Contains all the support you need to amplify solid weight loss efforts and blow past weight loss plateaus! Methionine, inositol and choline are required for fat metabolism in the liver and carnitine helps to bring fat into the mitochondria to burn as energy, especially important on a low carbohydrate diet. B12 is also included for the benefits with metabolism and weight loss. When used with more intensive diet and exercise plans, may be suggested 1-2 times per week. **\$45**

LIVER BOOST

Contains glutathione which is important in liver function and toxin removal from the body. If you don't have time for a full IV, this smaller dose can be helpful in preventing hangovers and giving the body additional fuel to deal with toxins in the environment. Suggested every 1-4 weeks. **\$45**
